

Letter of intent

To: Intelligens Technológiák Kft.

We understand Intelligens Technológiák Kft. is involved in the development of data encryption methodologies, including theoretical and applied research.

Based on the discussions between our companies and the work that Intelligens Technológiák Kft. has done so far, NI Hungary Kft. states that:

- Intelligens Technológiák Kft. develops high value-added technology in the field of symmetric stream encryption and block encryption systems;
- NI Hungary Kft. follows these development efforts with great interest, and if a market-ready solution becomes available, will evaluate the utilization of these systems in our operations.

This letter does not constitute any legal commitment to participate in research or purchase any products or services.
